Smart Volatility Watermark

In professional trading, switching back and forth between tabs to remember if a stock is a "Large-Cap Tech" or a "Small-Cap Biotech" breaks your focus. Having a **faint, ghostly watermark** floating in the background of the chart that provides the Company Name, Market Cap, Sector, and *Dynamic Volatility (ATR %)* is exactly what premium setups do.

The **Dynamic ATR Volatility %** is especially brilliant. If the watermark flashes **RED circle**, it means **HIGH VOLATILITY (> 4%)**, it instantly reminds you to reduce your position size (Kelly Criterion) before you even look at the ML models!
